Simulation Support in Construction ncertainty Management 3 is formulated for a better understanding of the
meaning of uncertainty during the calculation or execution of a production plan or schedule. In simulation
supported schedule evaluation, simulation is often used for evaluating the robustness of the schedule. A pro-

and simulation of complex systems is evident by the great plethora of books and papers recently dedicated to
this subject. When optimizing systemsâ€™ performances, accounting for or neglecting uncertainty may lead
to completely different results; therefore, uncertainty management is a major issue in simulation-optimization.
